

*Threads and colours that
set your imagination free*

Range brochure

Mettler[®]

Thread.Colour.Imagination.

The possibilities behind the products

THE CREATIVE NEEDLEWORKER NEEDS THREE THINGS: THREADS, COLOUR AND IMAGINATION. ALL THREE ARE SUPPLIED BY METTLER. HIGH-QUALITY THREADS FOR EVERY REQUIREMENT AND APPLICATION. AN ENDLESS VARIETY OF COLOURS FOR EVERY STYLE. AND IMAGINATION, BROUGHT TO LIFE BY THE ENDLESS APPLICATION POSSIBILITIES OF OUR THREADS.

The Mettler product range contains everything that you need for sewing, quilting, embroidery and overlocking. These specialist threads are available in a diverse range of colours, surface finishes, looks and effects.

The product range contains, for example, SERALON®, the universal thread which is ideal for use on cotton, synthetics, mixed fabrics, linen or silk. Or POLY SHEEN®, the charming embroidery thread, which impresses through its incredible brilliance of colour. SILK-FINISH COTTON, whose length makes it perfectly suited to longarm quilting, or high tensile overlocking threads. Mettler never fails its

needleworkers when it comes to sewing, embroidery, quilting or overlocking. Enjoy "window-shopping" through our range of threads on the following pages.

The product range of the Amann Group Mettler brand is also available in attractive gift sets.

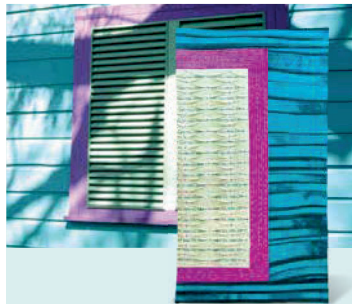

SEWING

**Imagination without limits.
And all the necessary threads.**

Different threads and the wide range of colours guarantee excellent stitching and set the creative spirit free.

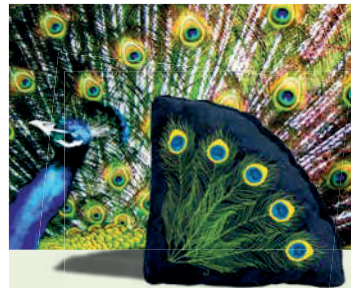

QUILTING

**Show your individuality in
your quilting.**

With threads from Mettler you can find your own style. Bring imagination to life with new contrasts, colour combinations and effects. The cotton threads are extremely tear-resistant and glide effortlessly through even the firmest fabrics, by machine or by hand.

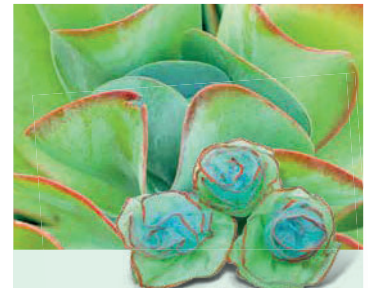

EMBROIDERY

**Think of embroidery as a
window to your imagination.**

The embroidery threads from Mettler shine with improved elasticity and increased tensile strength. Add to that outstanding sewability, exceptional brilliance of colour and extreme resilience, whether the final effect is stylish, elegant, playful or traditional.

OVERLOCKING

**Challenge your imagination.
Especially when overlocking.**

With the robust overlock threads from Mettler everything becomes easy: classic needlework projects, borders and fine fabrics as well as lingerie and sportswear. All your projects will benefit from extremely clean, fine, resilient stitching.

Sews everything well

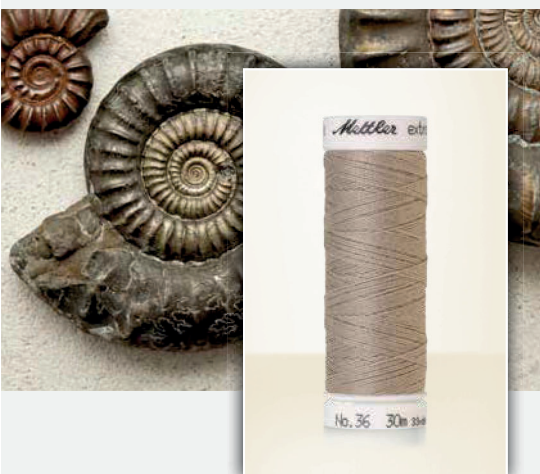

Cotton, synthetics, mixed fabrics, linen or silk – clothes make the man. And the universal thread METROSENE® will ensure that you and your clothes make a particularly dazzling appearance. Its excellent smoothness, high tensile strength and ideal sewability make universal METROSENE® a reliable partner for all your creations.

Extra strength for extra durability

The name says it all: EXTRA STRONG. It holds together what belongs together - for years on end. This thread was created for seams that have to resist the highest levels of stress. EXTRA STRONG can be used as a stable, tear and chafe resistant thread or in decorative applications. Whatever the requirement, it always produces an extra strong result.

Makes jeans look better

Thanks to its perfect combination of polyester core and cotton covering, DENIM DOC is the perfect thread for denim seams and for darning. The thread is particularly well-suited for closing, topstitch and serging seams. Excellent results can also be achieved when used as needle thread for matt embroideries.

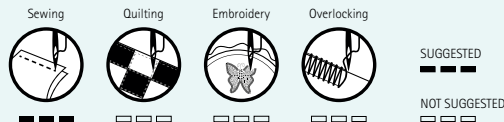

Article no.	Raw Material	Strength	Length	Number of colours	Linear density	Needle size Nm	Tensile strength cN	Elongation at break %	Care Instructions

SERAFLEX 100% PTT (Polytrimethylenterephthalat)

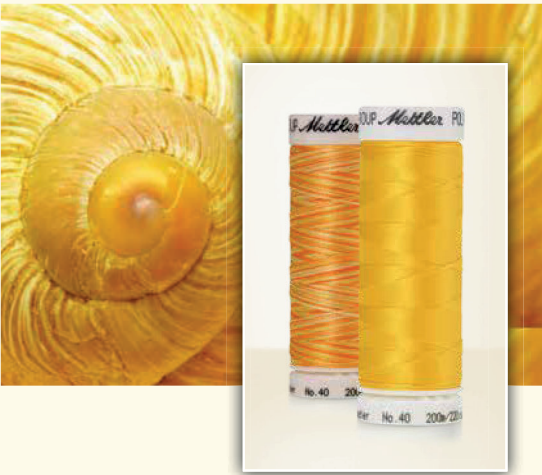

Fantastic - elastic

SERAFLEX is the perfect sewing thread for highly elastic seams. Due to its innovative raw material PTT (37% renewable raw material) an elongation of approx. 65% is achieved, making all seams highly elastic. SERAFLEX makes especially the straight stitch extremely stretchable, in the best case even a doubling of the seam elasticity can be achieved compared to seams with conventional sewing threads. Due to its extremely elastic properties SERAFLEX is primarily used for clothing, e.g. as sewing thread for ladies' outerwear, for menswear, for sportswear and outdoor as well as for lingerie and underwear. Instructions for use: use both as needle and bobbin thread; thread tension as loose as possible.

7840	100% PTT (Polytrimethylenterephthalat)	120	130 m / 142 yds	36	approx. Nm 83 / 3 (dtex 120*3)	70-80	approx. 800	approx. 65	

Gleaming with colour

Compared to conventional embroidery and decorative sewing threads, POLY SHEEN® and POLY SHEEN® MULTI have a much larger surface to reflect light due to their trilobal filament cross-section. This is why they shine so beautifully. Add to that a high tensile strength and abrasion resistance as well as excellent embroidery features and sewability. POLY SHEEN® and POLY SHEEN® MULTI can be used universally and are particularly well suited for use in highly stressed textiles such as sports and leisurewear, children's, leather and work clothing, denim and terry cloth. The color brilliance of these threads lasts over many years even when subject to harsh treatments, such as chlorine bleach.

SILK-FINISH COTTON 28 100% Mercerized cotton

Sets strong emphases

SILK-FINISH COTTON 28 is a high-quality cotton thread which can set lovely emphases. Through its thickness, SILK-FINISH COTTON 28 is excellent for lockstitching, hand quilting or hand embroidery. Furthermore, wonderful effects on decorative applications, ornamental stitchings and applications can be achieved with this thread of 100 % long staple, Egyptian cotton. It can also be used for buttonholes or for sewing the hemline of jeans. The mercerization process provides high tensile strength, heat resistance and has greatly reduced shrinkage.

9129			245 m/267 yds	4					

SILK-FINISH COTTON 40 100% Mercerized cotton

Creativity never ends

SILK-FINISH COTTON 40 is made 100 % from long staple, Egyptian cotton and is excellently suited to patchworking and quilting. This thread is slightly thicker and therefore shows more beautiful decorative effects. Furthermore, SILK-FINISH COTTON 40 is also perfectly suited to sewing and because of the mercerization process has a very reduced shrinkage and is heat resistant.

SILK-FINISH COTTON 50 & SILK-FINISH COTTON MULTI 50 100% Mercerized cotton

Softness with perfection

SILK-FINISH COTTON 50 is the perfect sewing and quilting thread for your finest cotton creations. The high-quality thread boasts a luxuriously soft effect and has a supple feel. SILK-FINISH COTTON 50 is available in a wide choice of colours and different spool sizes, whereas the larger spools are perfectly suited to longarm-quilting. Through the mercerization process, SILK-FINISH COTTON 50 reaches a high breaking point, high heat resistance and has reduced shrinkage. The multi-colour thread impresses with its natural shine and gives all your creations special effects.

SILK-FINISH COTTON 60 100% Mercerized cotton

Beautiful stitching

SILK-FINISH COTTON 60 is the perfect piecing, quilting and fine embroidery thread which can be sewn on batiste, tulle, cotton, linen, terry cloth and much more. This high-quality thread turns embroidery designs and decorative stitches into individual masterpieces. SILK-FINISH COTTON 60 is made 100% from long staple, Egyptian cotton which creates a soft, smooth and silk-like feel. Through the special dyeing technique, SILK-FINISH COTTON 60 stays extremely colourfast for years. Especially for longarm quilting, there is a length over 2743m / 3000 yds in the product range.

SERACOR 100% Polyester

The all-rounder of overlock threads

SERACOR, the all-rounder in the Mettler overlock threads, masters all classic needlework with ease. It can be used in the entire overlock range and has outstanding seam elasticity combined with a filigree look. SERACOR has a strong core, around which the smooth fibers are spun. This gives the thread its matt appearance. Ideal for borders and all classic overlock applications.

SERALENE 100% Polyester

Fine and easy

SERALENE is perfect for creating fine, almost invisible seams on lightweight fabrics. Ideal as needle and looper thread for high-quality overlocking as well as for invisible stitching and decorative work. Unsurpassed and trouble-free sewability even on the most sophisticated overlock machines. SERALENE is also perfect for embroidering monograms and fine details. SERALENE does not shrink and is easy to use. The snap-lock Miniking spool provides a safe, clean and practical storage place.

SERAFLOCK 100% Polyester, Bulk thread

Master of lightness

SERAFLOCK, the bulky overlock thread for joining seams on elastic and knitted fabrics. Ideal for wool and elastic seams in knitted fabrics, such as underwear, gymnastic and swimwear. Also suitable for decorative seams. Unsurpassed and trouble-free sewability, even on the most sophisticated overlock machines. SERAFLOCK does not shrink and is easy to use. The snap-lock Miniking spool provides a safe, clean and practical storage place.

POLY GLOW 50% PBT (Polybutylene terephthalate) . 50 % PP (Polypropylene)

A highlight in the dark

POLY GLOW is a phosphorescent, washable embroidery thread that stores UV and artificial light, making embroideries and seams glow in the dark. The thread is extremely well-suited for extraordinary effects on sports-, kids- and leisure wear, bags and satchels as well as for embroidering logos and letterings.

BOBBINETTE 100% Polyester

Among many, one of the best

For very fine and delicate fabrics and pucker free seams, as well as for high-quality serging. BOBBINETTE is especially good as bobbin thread in combination with Amann Group Mettler POLY SHEEN® or Amann Group ISACORD.

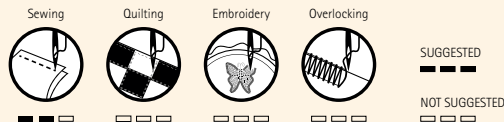

Article no.	Raw Material	Strength	Length	Number of colours	Linear density	Needle size Nm	Tensile strength cN	Elongation at break %	Care Instructions

ELASTIC 62% Elastane . 38% Polyester

Stretching for fantasy

For general sewing purposes, this highly ELASTIC thread, made of elastane and polyester, is particularly suited for smocking on both rigid and stretchable fabrics as well as for frill seams in hemming. The ELASTIC thread should only be used on the sewing machine as bobbin thread. Here the intensity of the ripple can be regulated using the bobbin thread tension. It is absolutely necessary to secure seam beginning and seam end. It is also recommended to use relatively long lockstitches.

To send effective signals

The thread is recommended for all creations, in which the seam should remain invisible. TRANSFIL can be used on every sewing machine as upper and as bobbin thread. The length 1000m/1094yds was launched specifically for quilting customers, so that the thread will last long enough for elaborate creations.
